

# Revitalize

**My Filler's** "New Life to the Skin" widens its application horizons and creates **My Filler** "Revitalize", the special line of products for Mesotherapy procedures.

**My Filler Revitalize** is a state-of-the-art range and complete portfolio of sterile topical cosmetics for professional use.

## My FILLER Revitalize Pure

Stretch marks, acne marks, scar marks and other skin imperfections are undesirable for anyone from an aesthetic point of view. The Revitalize Pure unique formulation has the perfect mixture and balance of collagen with hyaluronic acid. It increases the generation of new collagen fibers, repairs and reinforces the existing ones.

Repairing and restructuring treatment which was dreamed about ,is now a reality...

### REVITALZE PURE

**Indication:**

For all skin types that need to regenerate the texture and tonality.

## Revitalize Pure

### REVITALIZE PROTOCOL

1. Clean, sterilize and apply anesthetic topical cream to the chosen area to be treated.
2. After 30-60 minutes check if the area is numb. Remove topical cream with gauze and warm water. Exfoliate the area with a double cleanse, sterilize area and blot dry. Protect patient using appropriate means of covering like gauze, micropore tape and head-band.

3. Select chosen mesotherapy product and draw down 1ml into sterile container - two products can be mixed together to form a cocktail ½ ml each.

4. Apply the product to area being treated with a cotton bud or gauze.
5. Choose depth on micro-needling pen to maximum depth for the areas following (1mm face and 2-2.5mm body) and begin to stamp the mesotherapy product into the skin covering all areas.

6. Apply another layer of mesotherapy product.
7. Reduce pen depth to half previous chosen. Create rows vertical and horizontal to cover all the areas.
8. Apply another layer of mesotherapy and repeat using 's' sweeping motions with the Revitalize to cover all areas.

9. Apply the remaining mesotherapy product liberally all over with cotton bud or gauze.
10. A mask can be used to relax the skin for 5 minutes.
11. Blot the area dry with a tissue.
12. Apply moisturiser and/or SPF cream.
